A radioactive element is an element with an unstable nucleus, which radiates alpha, beta or gamma radiation and gets converted to a stable element 398 399 400 Answer

Answers about Chemistry

Elemental zoo worksheet will help you learn the symbols. Try out the elemental supermarket worksheet as well. It was made by previous year's chemistry students (class of 2012).

Elements

While the elements have been around forever, it wasn't until 1869 that Dimitri Mendeleev started putting the periodic table of elements together. At that point in time, all the elements were being fit into their proper place on this table and in the world of science. Some elements have always been more well-known than others.
